Questions

Interest

effect will go into play.

Overall model of equipment

Standardization to T

inner workings are new

Jan, Feb

Computingation

AS P.

Modul

smaller,

Modulation

Silver - color

~~✓~~ smaller, more compact -

modular,

Soviet targeting will be  
up-monitoring

currently ongoing process

Testing phase is completed

(2)

will be several of these  
Modules inside is the  
difference -

ADP - will be able to take  
info faster

signals

Data flow inward

Signal communication

Red lines across the  
compute screen

Cusps -

Rider -

The extreme of the  
systems that the Soviet  
are going for.

Rider prefers to see bigger  
enhance - scope at faster  
rate of speed

③

The Rider System  
goes into effect close to  
Xmas time frame

enables men with wakken  
give faster rates of activity

System is excellent on  
"Vessel"

info comes in but can  
send info out

Satellite involved  
Very modern - molecular  
ADP - in and out  
must be accomplished soon

use for conventional warfare  
can take out of Vessel and  
use ~~suit~~ elsewhere -

because of small size

(4)

radio active particle -

emitting

- Name:

Eastern Block Country -

officials - counter part

~~Donner~~  
~~Danner~~

Gollie - Golie Dommer.

counter parts to the Dommer  
info shared with U.S.

can be found in European center.

→ Eastern Block Person

- Reactors

Radio Active particle

Scientific orientation toward

this equip in Soviet -

& higher Scient. level

Before give to Navy

Afghanistan.

(5)

This is  
last minute decision  
decision to use on Naval Varyag  
very political  
S.Y. not sure whether to  
use it or not -  
fast decision - political  
? why Politically Sensitive

B Meuter

Meuther

Scientists love this  
show progress.

Decisive use political  
was - SU interest -

other countries  
new tactics

had something to do with

Afghanistan

⑥

Reason for -

Because Reactor - to locate  
Super fine - to

Super intelligence  
trying to walk thru stuff  
Intell nets -

Receive signal

Artificial Intelligence  
able to find out -

Satellite countries  
trying to find info on countries  
not close to him -

mechanics - mechan

Artificial Intell techniques

Info in Chinese

Chinese getting more scientific  
now

Chinese Launch pads -

what Chinese doing with  
Southern Neighbors

Soviet realizing that going into  
country and taking over - not good

Collecting Scientific development  
of other countries (China)  
and their interest in Space.

Can locate certain Reactors  
in other countries -

Collect and will know -  
how far advanced others are  
Helps in political game.

System will sample Submarine

modular - and can be used

elsewhere

? Why in Sub?

the Sub moves faster - <sup>test</sup> purpose

(8)

things they did not want

It's shelved -

? equip to control Sub. or  
collect data?

After decision to put in Sub -  
it was shelved -

Can work other places

? What kind of info

- Signal waves

- Strands

- Signal Intelligence  
Wanting to know what  
Nuclear reactors are

Soviets install to locate

N. React. + gather

info on launch pads

They can detect when +  
Where nuclear warheads  
are put on -

They can determine if  
there is Nuc. Warhead on -  
Date on where, how  
many.

Can monitor how many  
more - and

? Whose ?

They Chinese

- Mueller - System
- Meether

Ritter  
Rotary  
System - (modular system)

No Blue

" " purple

Yr Orange

ms red

no green.

~~no~~ red

10

Same type of info on Rotary

- Augsburg -

- East Berlin

Germany has the info -

that U.S. Naval people will be  
able to receive

path thru Gen Saenger  
division

division of methodology

a piece here & there

Gallie comes into

play -

check in with sources in Germany

Mentha - East German -

who will be able to satisfy

markets -

involved in Production of Rotary

Syntex -

designed by Soviets

East Germans -

possess technical skill also  
They have the modules -

Soviets designed it -

But ~~he~~ gave each  
country - given a part to  
to build - then gathered  
together in Soviet Union  
and put together -

Specifics on 9  
mechanical

Radiating (Radar) Beams -

Cryptotube forms -

Cryptals -
